ABOUT ME

I like to tackle new challenges, incorporate new technologies and provide good solutions to problems. I am self-critical and I am always willing to get feedback to progress professionally. Although I have been mainly inclined towards Backend development, I have learned different technologies to be able to provide full systems.

EXPERIENCE

04/2021 – Now   **Freelance developer**

Development of multiple plugins for Wordpress integrating different payment methods, services and systems via API REST.

Development of three Full Stack Web projects in Laravel, including all its phases, integrated via API to corresponding plugins in Wordpress:
- System to store and distribute codes safely and maintaining data integrity.
- System to obtain requests from clients in real time and allow them to be managed by staff.
- System to integrate multiple payment methods and provide payment service at different points of sale.

`Wordpress  /  Laravel`

06/2019 – 04/2021 **Developer**   **Iexen**
part time

Approaching different challenges in different technologies, autonomously and as a team. CMR study and application development. Development and maintenance of web and mobile applications. Integration with multiple REST services. Worked in contact with customer requirements.

`Salesforce  /  Symphony  /  Yii  /  Ionic`

07/2018 – 12/2018 **IT technician**   **UdelaR**
media jornada

DNS system maintenance and program configuration for data migration.

`Linux  /  Talend`

EDUCATION

2014 – 2022   **Computer Engineering**   **Facultad de Ingeniería (UdelaR, Uruguay)**

During the degree I learned the fundamentals of computer science and systems development. I was able to learn to solve complex problems, working as a team and individually, incorporating new technologies and tools.
